TACHDJIAN'S Pediatric Orthopaedics

THIRD EDITION

from the Texas Scottish Rite Hospital for Children

VOLUME 3

2 2 MAR 2005

John Anthony Herring, M.D.

Chief of Staff
Texas Scottish Rite Hospital for Children
Professor of Orthopaedic Surgery
University of Texas Southwestern Medical Center
Dallas, Texas

WE 365

Saunders

An Imprint of Elsevier

2002

CONTENTS

VOLUME 1	The Thoracolumbar Spine, 35
	Flexion, 36
	Extension, 36
	Lateral Bending, 36
	Rotation, 36
SECTION I • Disciplines1	The Hip, 36
(. ●	Flexion/Extension, 38
	Abduction/Adduction, 39
CHAPTER 1	Rotation, 40
Growth and Development3	Trendelenburg's Test, 41 The Knee, 43
Normal Growth and Development, 3	The Ankle and Foot, 43
Disorders of Normal Growth and Development, 5	Muscle Strength, 44
Malformations, 5	Neurologic Assessment, 46
Deformations, 5	Developmental Reflexes, 46
Disruptions, 5	Palmar (Hand) Grasp Reflex, 46
Dysplasias, 5	Plantar (Foot) Grasp Reflex, 46
Evolution of Proportionate Body Size, 5	Moro's Reflex, 46
Physical Growth, 10	Startle Reflex, 49
Epiphyseal Growth and Closure, 10	Vertical Suspension Positioning, 49
Head Circumference, 10	Placing Reaction, 49
Height and Weight, 10	Walking or Stepping Reflex, 49
Tanner's Stages of Development, 19	Crossed Extension Reflex, 51
Developmental Milestones, 19	Withdrawal Reflex, 51
Gross Motor Skills, 19	Positive Support Response/Leg-Straightening Reflex, 51
Fine Motor Skills, 20	Extensor Thrust Reflex, 52
Personal, Social, and Verbal Skills, 21	Galant's Reflex (Trunk Incurvation), 52
	Rotation Reflex, 52
	Tonic Neck Reflexes, 53
CHAPTER 2	Landau Reflex, 54
The Orthopaedic History23	Parachute Reaction/Protective Extension of Arms Reflex, 54
Chief Complaint, 23	Neck Righting Reflex, 54
History of Present Illness, 23	Body Righting Reflex, 55
Family History, 23	Oral Reflexes, 55
Birth History, 23	Deep Tendon Reflexes (Muscle Stretch Reflexes), 56
Prenatal History, 23	Peripheral Reflexes/Abdominal Reflexes, 56
Natal History, 24	Appendix 3-1: Texas Scottish Rite Hospital for Children
Neonatal History, 24	Initial History and Examination Form, 58
Growth and Development: The Key Questions, 24	Appendix 3-2: Manual Muscle Tests of the Lower and Upper Extremities, 59
CHAPTER 3	
	CHAPTER 4
The Orthopaedic Examination:	
A Comprehensive Overview25	The Orthopaedic Examination:
Recognizing Deformities, 25	Clinical Application63
Angular Deformity, 25	Screening Examinations, 63
Contractures, 26	The Hip Examination, 63
Spasticity, 27	Other Newborn Screening Examinations, 64
Joint Range of Motion, 27	The Scoliosis Examination, 64
The Shoulder, 29	General Childhood Screening Examination, 64
The Elbow, 31	The Focused Examination, 65
The Forearm, 31	Intoeing, 65

Flatfoot, 67

The Cervical Spine, 32

Leg Length Discrepancy, 68	CHAPTER 7
Spinal Deformity, 68	Back Pain
The Art of Examining the Pediatric Patient, 70	History, 95
	Nature of the Pain, 95
CHAPTER 5	Constitutional Symptoms, 95
	Aggravating and Alleviating Factors, 95
Gait Analysis	Age-Related Conditions, 96
Phases of Gait, 75	Psychosomatic Pain, 96
Stance Phase, 75	Assessment of General Symptoms, 96
Swing Phase, 75	Physical Examination, 96
Time Spent in Each Phase, 75	General Inspection, 96 Assessment of the Spine, 96
Temporal Parameters, 75 Neurologic Control of Gait, 76	Neurologic Assessment, 97
Function of Gait, 76	General Physical Assessment, 97
Gait Energy, 76	Diagnostic Studies, 97
Kinematics, 77	Radiography, 97
Sagittal Plane, 77	Bone Scan, 98
Coronal Plane, 77	Computed Tomography, 98
Transverse Plane, 78	Single-Photon Emission Computed Tomography, 98
Muscle Activity, 79	Magnetic Resonance Imaging, 98 Laboratory Tests, 98
Types of Muscle Contraction, 79 Concentric Contractions, 79	Differential Diagnoses, 98
Eccentric Contractions, 79 Eccentric Contractions, 79	Mechanical Disorders, 98
Muscle Activity During Stance and Swing Phases, 80	Muscle Strain, 98
Kinetics, 81	Disk Herniation, 98
Pathologic Gait, 81	Apophyseal Ring Fracture/Slipped Vertebral Apophysis, 99
Gait Analysis Laboratories, 81	Spinal Fracture, 99
	Developmental Disorders, 99
CONTROL PROVIDENCE AND	Spondylolysis and Spondylolisthesis, 99
CHAPTER 6	Scheuermann's Kyphosis, 101 Lumbar Scheuermann's Disease, 102
The Limping Child 83	Idiopathic Scoliosis, 102
Abnormal Gait Patterns in Children, 83	Syringomyelia, 102
Antalgic Gait, 83	Tethered Spinal Cord, 102
Trendelenburg Gait, 84	Idiopathic Juvenile Osteoporosis, 102
Proximal Muscle Weakness Gait, 84	Infectious and Inflammatory Conditions, 102
Spastic Gait, 84	Diskitis, 102
Short-Limb Gait, 84	Vertebral Osteomyelitis, 103
Special Considerations Based on Age Group, 85	Ankylosing Spondylitis, 103
Toddler (Ages 1 to 3 Years), 85	Juvenile Rheumatoid Arthritis, 103 Neoplasms, 104
Child (Ages 4 to 10 Years), 85	Osteoid Osteoma, 104
Adolescent (Ages 11 to 15 Years), 85 Differential Diagnosis of Limping in Children, 86	Osteoblastoma, 104
Inflammatory and Infectious Disorders, 86	Eosinophilic Granuloma (Histiocytosis X), 104
Transient Synovitis, 86	Aneurysmal Bone Cysts, 104
Septic Arthritis, 86	Malignancies, 104
Osteomyelitis, 87	Intra-abdominal and Intrathoracic Causes of Back
Diskitis, 87	Pain, 105
Pauciarticular Juvenile Arthritis, 88	Psychosomatic Back Pain (Conversion Reaction), 105
Neurologic Disorders, 88	
Cerebral Palsy, 88 Muscular Dystrophy, 88	CHARTER 9
Anatomic Disorders, 89	CHAPTER 8
Developmental Dysplasia of the Hip, 89	Anesthesiology109
Coxa Vara, 89	Preoperative Evaluation of Children, 109
Legg-Calvé-Perthes Disease, 89	Upper Respiratory Infection, 110
Slipped Capital Femoral Epiphysis, 90	Diagnosis of URI, 110
Chondrolysis, 91	Asthma, 110
Osteochondritis Dissecans, 91	NPO Requirements in Infants and Children, 110
Discoid Meniscus, 91	Postoperative Fluid Management, 111
Toddler's Fracture, 91	Hourly Maintenance Fluid Requirement, 111
Tarsal Coalitions, 92 Overuse Syndromes, 92	Sedation for the Pediatric Patient by Nonanesthesiologists, 111
Limb Length Discrepancy, 92	Sedation and Analgesia (Conscious Sedation), 111
Neoplasms to Consider in the Limping Child, 93	Deep Sedation, 111
Leukemia, 93	Patient Selection and Evaluation, 111
Osteoid Osteoma, 93	Acute Pain Management, 112

Assessment of Pain in Children, 112	Child-Friendly Radiology Department and Technical
Self-Assessment, 112	Staff, 132 Equipment Requisites for X-Ray Production, 133
Physiologic Measurement and Behavioral Observation, 112	X-Ray Generators, 133
Pain Management, 112	X-Ray Tube, 133
Systemic Analgesia, 112 Nonopioid Analgesics, 112	Collimators, 133
Opioids, 113	Grids, 133
Regional Analgesia, 114	Cassettes, 133
General Recommendations for Epidurals, 114	Luminescent Screen-Film Combinations, 134
Intravenous Regional Anesthesia, 115	Computed Radiography, 134
Indications, 115	Advantages of CR over Conventional Radiography, 134
Contraindications, 115	Patient Preparation for Radiologic Examinations, 135
Technique, 115	Patient and Image Identification, 135
Choice of Local Anesthetics, 115	Patient Protection, 135
Side Effects of Local Anesthesia, 115	Immobilization, 135
Strategies to Reduce Blood Transfusions, 116	Shielding of Reproductive Organs, 135 Shielding of Breast Tissue, 137
Induced Hypotension, 116	Pregnancy Screening, 137
Autologous Blood Donation, 116	Computed Tomography in Pediatric Orthopaedics, 137
Latex Allergy, 117	The CT Scanner, 138
Identification of a High-Risk Pediatric Group, 117	Physical Principles, 139
Clinical Manifestations of Latex Allergy, 117	Technical Considerations, 140
Screening for Latex Allergy, 117 Management of Latex-Sensitive Patients, 117	Radiation Considerations, 145
Malignant Hyperthermia, 118	Clinical Applications, 145
Signs and Symptoms, 118	Magnetic Resonance Imaging in Pediatric
Treatment, 118	Orthopaedics, 150
Conditions Associated with Malignant Hyperthermia, 118	History, 150
Appendix 8-1: Anesthetic Considerations for Pediatric	Basic Physics, 151
Orthopaedic Syndromes, 120	Appearance of the MR Image, 152
	Image Interpretation, 153
	Imaging Artifacts, 155 Imaging Enhancement, 156
CHAPTER 9	Safety Precautions and Patient Preparation, 156
maging127	Indications for MRI in Pediatric Musculoskeletal
	Disease, 158
Conventional Radiographic Procedures, 127	Ultrasonography, 163
Introduction, 127	Physics, 163
An Approach to Interpreting Pediatric Orthopaedic	Image Generation, 163
Films, 127	Doppler Imaging, 163
Viewing Conditions, 127	Applications, 164
Impact of Clinical History on Film Interpretation, 127	Nuclear Imaging, 165
Examination of the Soft Tissues, 129 Examination of All Organ Systems Included in the	
Radiographic Study, 129	SECTION II • Anatomic Disorders 16
Evaluation of the Skeletal System Not Obviously Involved by	SECTION 1 7 Maconine Disorders
Pathology, 129	CHARTER 10
The Importance of Previous Studies, 129	CHAPTER 10
When Plain Films Stand Alone, 130	Disorders of the Neck17
Normal Radiographic Variants of the Immature	Cervical Spine, 171
Skeleton, 130	Congenital Torticollis, 171
Several Synchondroses Commonly Mistaken for	Congenital Muscular Torticollis, 171
Fractures, 130	Treatment, 172
Sphenoid Bone Synchondroses, 130	Klippel-Feil Syndrome, 173
Body of C2 and Odontoid Synchondrosis, 130	Clinical Features, 175
Synchondroses Between Vertebral Bodies and Neural	Radiographic Features, 176
Arches, 131	Treatment, 181
A Synchondrosis Commonly Confused with Infections or	Acquired Torticollis, 187
Neoplastic Change, 131	Atlantoaxial Rotatory Displacement, 187
Ischiopubic Synchondrosis, 131	Radiographic Findings, 189
Several Bony Normal Variants That Are Frequently Confused	Treatment, 189
with Pathologic Changes, 131 Osteosclerosis of the Newborn, 131	Neurogenic Torticollis, 191 Inflammatory/Septic Causes, 193
Physiologic Periosteal New Bone Formation of the	Vertebral Osteomyelitis and Diskitis, 193
Newborn, 131	Tumor-like Conditions, 194
Cervical Spine Pseudosubluxation, 131	Intervertebral Disk Calcification, 194
Dense Transverse Metaphyseal Lines, 132	Juvenile Rheumatoid Arthritis, 194
Avulsive Cortical Irregularity, 132	Sandifer's Syndrome, 194
Radiographic Technique, 132	Ocular Torticollis, 194

Cervical Kyphosis, 195	Zielke Ventral Derotation Spondylodesis
Clinical Features, 195	Instrumentation, 259
Radiographic Findings, 199	Newer Generation Solid Rod Anterior Instrumentation for
Treatment, 199	Thoracolumbar and Lumbar Deformity, 260
Acquired Postlaminectomy Kyphosis, 202	Anterior Instrumentation for Thoracic Deformity, 261
Treatment, 204	Infantile and Juvenile Idiopathic Scoliosis, 261
Cervical Instability, 204	Infantile Idiopathic Scoliosis, 276
Os Odontoideum, 206	Clinical Features, 276
Occipital-Atlantal Anomalies, 206	Natural History, 276
Odontoid Anomalies/Ligamentous Instability, 209	Methods for Predicting Progression, 276
Nontraumatic Occipital-Atlantal Instability, 209 Subaxial Instability, 209	Factors Influencing Curve Progression, 277 Neural Axis Abnormalities, 277
Subaxial Histability, 209	Management of Curves That Resolve, 277
	Nonoperative Treatment for Progressive Curves, 277
CHARTER 11	Operative Treatment, 277
CHAPTER 11	Juvenile Idiopathic Scoliosis, 280
Scoliosis213	Natural History, 280
Definition, 213	Predicting Curve Progression, 280
Classification of Scoliotic Curves, 213	Neural Axis Abnormalities, 280
Idiopathic Scoliosis, 213	Treatment, 280
Adolescent Idiopathic Scoliosis, 213	Congenital Spine Deformities, 280
Prevalence, 213	Etiology, 280
Natural History, 214	Associated Abnormalities, 281
Natural History Before Skeletal Maturity, 214	Congenital Scoliosis, 283
Natural History After Skeletal Maturity, 216	Classification, 283
Scoliosis Screening, 216	Failure of Formation, 283
School Screening Programs, 216	Failure of Segmentation, 284
Screening Methods, 217	Natural History, 285
Etiology, 218	Radiographic Evaluation, 287
Neurologic Dysfunction, 218	Nonoperative Treatment, 287
Connective Tissue Abnormalities, 218	Operative Treatment, 287
Genetic Factors, 218	Congenital Kyphosis, 291
Pathophysiology, 219	Classification, 291
Patient Evaluation, 221	Failure of Formation (Type I), 291
Presenting Complaint, 221	Failure of Segmentation (Type II), 291
Physical Examination, 221	Natural History, 291
Neurologic Examination, 223	Clinical Features, 294
Patient Maturity, 224	Radiographic Evaluation, 294
Imaging Studies, 224	Treatment, 294
Plain Radiography, 224	Segmental Spinal Dysgenesis, Congenital Dislocation of the
Surface Imaging, 226	Spine, and Congenital Vertebral Displacement, 297 Other Causes of Scoliosis, 299
Magnetic Resonance Imaging, 227	Neurofibromatosis, 299
Computed Tomography, 227	Nondystrophic Scoliosis, 299
General Treatment Concepts, 228	Dystrophic Scoliosis, 299
Observation, 228	Treatment for Dystrophic Scoliosis, 301
Nonsurgical Treatment, 228	Marfan's Syndrome, 302
Orthotic (Brace) Treatment, 229	Congenital Heart Disease, 308
Electrical Stimulation, 232	Thoracogenic, 308
Physical Therapy/Biofeedback, 232	Postlaminectomy, 308
Surgical Protocols, 232	Irradiation, 312
Indications for Surgery, 233	Hysterical Scoliosis, 312
Preoperative Planning, 234	
Spinal Cord Monitoring, 241	
Postoperative Pain Management, 241	CHAPTER 12
Posterior Spinal Instrumentation, 241	Kyphosis323
Harrington Instrumentation, 241	курпозіз
Luque Double L-Rod Segmented Instrumentation, 242	Postural Development, 323
Wisconsin Segmental Spinal Instrumentation, 242	Postural Kyphosis, 323
Cotrel-Dubousset Instrumentation, 242	Scheuermann's Kyphosis, 324
Texas Scottish Rite Hospital Instrumentation, 243	Etiology, 325
Isola Instrumentation, 243	Clinical Features, 325
Complications Associated with Newer Generation Posterior	Radiographic Findings, 326
Instrumentation, 258	Nonoperative Treatment, 328
Additional Newer Generation Posterior	Brace Therapy, 328
Instrumentation, 259	Cast Treatment, 329
Anterior Spinal Instrumentation, 259 Dwyer Instrumentation, 259	Operative Treatment, 329
Dayer Misir american, 237	Indications, 329

Surgical Goal, 330	Principles of Dressing and Splinting, 382
Surgical Approach, 330	Dressings, 382
Preoperative Evaluation, 331	Wound Closure, 384
Determining Fusion Levels, 331	Primary Dressing, 385
Anterior Release and Fusion Technique, 333	Gentle Compression Components, 385
Thoracotomy Approach, 333	Padding and Skin Protection, 386
Thoracoscopic Anterior Release and Fusion, 333	Rigid Outer Shell, 386
Posterior Instrumentation and Fusion, 334	Splinting, 387
Progressive Noninfectious Anterior Fusion, 336	Introduction, 387
Postlaminectomy/Postirradiation Kyphosis, 337	Materials, 387
Postlaminectomy Kyphosis, 337	Securing the Splint, 390 Materials for Fabricating Total Contact Molding
Postirradiation Kyphosis, 339	Inserts, 390
Treatment, 339	Mechanical Principles, 392
Prevention, 339	Use of Distraction Techniques, 398
Prophylactic Treatment, 339	Principles of Acute Care, 398
Surgical Treatment, 345 Miscellaneous Causes of Kyphosis, 346	General Principles, 398
Achondroplasia, 346	Tendon Injury, 398
Pseudoachondroplasia, 346	Nerve Injury, 400
Spondyloepiphyseal Dysplasia/Mucopolysaccharidosis, 346	Skin Injury, 400
Marfan's Syndrome, 347	Bone Injury, 400
	Vascular Injury, 401
	Principles of Reconstruction, 404
CHAPTER 13	Architecture and Hand Physiology, 404
Other Anatomic Disorders of the	Nerve Function: Sensibility and Power, 404 Architecture of the Hand, 405
Other Anatomic Disorders of the	Planning Reconstruction, 405
Spine351	Evaluation of the Child for Reconstruction, 407
Spondylolisthesis, 351	Established Volkmann's Contracture of the Forearm, 408
Classification, 351	Congenital Anomalies, 410
Dysplastic Spondylolisthesis, 351	Classification, 410
Isthmic Spondylolisthesis, 352	Diagnosing Associated Anomalies, 411
Other Types of Spondylolisthesis, 354	Ulnar Dysplasia, 411
Clinical Presentation, 354	History, 411
Radiographic Findings, 354	Etiology, 411
Prognosis and Natural History, 356	Clinical Presentation, 412
Treatment, 358	Classification, 412
Spondylolysis, 358 Low-Grade Spondylolisthesis (<50 Percent Slip), 360	Pathology, 413
Low-Grade Spondylolisthesis (<50 Percent Slip), 360 High-Grade Spondylolisthesis (>50 Percent Slip), 363	Imaging, 413 Treatment, 413
In Situ Fusion, 365	Synostosis of the Radius and Ulna, 414
Summary of Treatment, 369	History, 414
Lumbar Disk Herniation, 369	Clinical Presentation, 415
Incidence, 371	Imaging, 415
Etiology, 371	Treatment, 415
Clinical Features, 371	Results, 416
Radiographic Studies, 371	Author's Preferred Treatment, 416
Treatment, 373	Madelung's Deformity, 416
Slipped Vertebral Apophysis, 374	History, 416
Clinical Presentation, 374	Etiology, 416
Treatment, 374	Pathology, 416
	Clinical Presentation, 417
	Imaging, 418 Treatment, 418
CHAPTER 14	Results, 421
Disorders of the Upper Extremity379	Complications, 421
	Polydactyly, 421
Introduction, 379 Embryology, 379	History, 421
History and Examination, 380	Etiology, 421
Pertinent History, 380	Pathology, 421
Physical Examination, 380	Clinical Presentation, 422
Timing of Surgical Procedures, 380	Clinical Appearance and Classification Systems, 422
The Parent, 381	Associated Conditions, 423
The Child's Maturity, 381	Imaging, 426
The Surgeon, 381	Treatment, 426
The Hand, 381	Complications, 432
The Anesthesiologist, 382	Syndactyly, 433
Suggested Surgical Milestones, 382	History, 433

Etiology, 433	Conditions Mimiglian Infanti
Pathology, 433	Conditions Mimicking Infection, 479
Clinical Presentation, 434	Traumatic Disorders, 479
Incidence, 434	Neonatal Brachial Plexus Palsy, 479
Associated Syndromes, 435	Etiology, 479
Imaging, 435	Classification, 480
Treatment, 436	Clinical Features, 480
Complications, 444	Prognosis and Natural History, 480
	Differential Diagnosis, 480
Thumb Dysplasia, 444	Initial Treatment, 481
History, 444	Later Treatment, 481
Tight Thumbs, 445	Residual Deformities, 481
Macrodactyly, 450	Management of Residual Deformities, 484
History, 450	Tumors of the Upper Limb, 487
Classification, 450	Imaging Studies, 496
Etiology, 451	Non-neoplastic Masses, 496
Pathology, 452	Supposed Court (Court)
Clinical Presentation, 454	Synovial Cysts (Ganglions, Retinacular Cysts), 496
Imaging, 456	Epidermoid Inclusion Cysts, 497
Treatment, 456	Foreign Bodies or Reactions, 497
Complications, 459	Aneurysms and Pseudo-aneurysms, 497
Congenital Band Syndrome, 461	Malformations, 497
History and Etislam ACI	Vascular Malformations, 497
History and Etiology, 461	Neoplasms, 502
Pathology, 461	Benign Lesions, 502
Clinical Presentation, 461	Fibrous Tumors, 502
Classification, 462	Malignant Soft Tissue, 502
Imaging, 463	Benign Bone Tumors, 503
Treatment, 463	Microsurgery, 503
Results, 466	Replantation (Attachment of Course 1 D. 1)

Mucopolysaccharidosis VI (Maroteaux-Lamy	Congenital Dislocation of the Elbow or Radial Head, 1611
Syndrome), 1580	Scoliosis, 1611
Niemann-Pick Disease, 1583	Summary 1614

Summary, 1614

	Pathology 1650
Apert's Syndrome, 1615	Pathology, 1650 Differential Diagnosis, 1650
Clinical Manifestations, 1615	Differential Diagnosis, 1650 Treatment, 1652
Treatment, 1615	
Down Syndrome (Trisomy 21), 1616	Goals of Treatment, 1652
Introduction, 1616	Timing of Treatment, 1652
Clinical Features, 1616	The Hip, 1652
Orthopaedic Aspects and Treatment, 1617	The Knees, 1652
Instability of the Upper Cervical Spine in Down	The Feet, 1653
Syndrome, 1617	Treatment of the Upper Extremities, 1654
Special Olympics, 1618	Scoliosis and Spine Deformity, 1660
Occipital-atlantal Instability, 1618	Craniocarpotarsal Dysplasia (Freeman-Sheldon or
Treatment of Upper Cervical Spine Instability, 1619	"Whistling Face" Syndrome), 1662
Hip Disorders, 1621	Clinical Features, 1662
Patellofemoral Disorders, 1623	Treatment, 1662
Foot Disorders, 1623	Cornelia de Lange's Syndrome, 1663
Neurofibromatosis, 1624	Rubinstein-Taybi Syndrome, 1665
Introduction, 1624	Orthopaedic Manifestations, 1665
Historical Perspective, 1624	Surgical Treatment, 1665
Neurofibromatosis Type 1 (von Recklinghausen's	Associated Anomalies, 1665
Disease), 1624	Otopalatodigital Syndrome, 1666
Genetic Aspects of NF-1, 1625	Proteus Syndrome, 1666
Diagnosis of NF-1, 1625	Clinical Features, 1666
Clinical Features of NF-1, 1625	Diagnosis, 1669
Skeletal Abnormalities in NF-1, 1628	Differential Diagnosis, 1669
Malignant Degeneration of Neurofibromas, 1628	Orthopaedic Management, 1669
Cognitive Deficits, 1628	Klippel-Trénaunay Syndrome, 1670
Neurofibromatosis Type 2, 1629	Pathophysiology, 1670
Fibrodysplasia Ossificans Progressiva, 1632	Clinical Features, 1671
Introduction, 1632	Nevus, 1671
Etiology, 1632	Varicosities, 1671
Clinical Features, 1632	Bone and Soft Tissue Hypertrophy, 1671
Radiographic Features, 1634	Diagnosis, 1672
Histology, 1636	Patient Evaluation, 1672
Treatment, 1638	Treatment, 1672
Ehlers-Danlos Syndrome, 1639	Orthopaedic Considerations, 1672
Clinical Features, 1639	Metatropic Dwarfism (Dysplasia), 1673
Classification	Camptomelic Dysplasia, 1677
Type I (Gravis), 1640	Clinical Features, 1677
Type II (Mitis), 1640	Spinal Deformity, 1679
Type III (Benign Hypermobile), 1640	Chondroectodermal Dysplasia (Ellis-van Creveld
Type IV (Ecchymotic), 1640	Syndrome), 1679
Type V, 1640	Genetics, 1679
Type VI, 1640	Clinical Features, 1679
Type VII, 1640	Radiographic Findings, 1680
Type VIII, 1640	Treatment, 1681
Gaucher's Disease, 1642	Orthopaedic Considerations, 1681
Genetics, 1642	Asphyxiating Thoracic Dysplasia (Jeune's Disease), 1683
Heredity, 1642	Pathology, 1683
Pathology, 1642	Clinical Features, 1683
Clinical Features, 1643	Radiographic Findings, 1683
Diagnosis, 1643	Prenatal Diagnosis, 1683
Prenatal Diagnosis, 1643	Treatment, 1683
Orthopaedic Manifestations, 1643	
Bone Marrow Infiltration, 1643

Osteomyelitis, 1645	General Pathophysiology, 1685
Treatment, 1645	Nutritional Rickets, 1686
Orthopaedic Considerations, 1645	Pathology, 1686
Arthrogryposis (Arthrogryposis Multiplex	Laboratory Findings, 1688
Congenita), 1647	Clinical Features, 1688
	Radiographic Findings, 1689
Etiology, 1647 Genetics, 1647	Treatment, 1689
Clinical Manifestations, 1648	Rickets of Prematurity, 1690
Classic Arthrogryposis, 1648	Drug-Induced Rickets, 1690
CHASH IIIIIOKI I POSISI 1010	

Vitamin D-Resistant Rickets, 1690

Classic Arthrogryposis, 1648 Distal Arthrogryposis, 1648

Laboratory Findings, 1690	Pathophysiology, 1718
Molecular Genetics, 1693	Normal Collagen Metabolism, 1718
Clinical Features, 1693	Collagen Metabolism in Ostooganais Lucy Collagen Metabolism in Ostooganais Lucy Collagen
Radiographic Findings, 1693	Collagen Metabolism in Osteogenesis Imperfecta, 1718 Classification and Heredity, 1718
Medical Treatment, 1693	Osteogenesis Imperfecta Type I, 1720
Orthopaedic Management, 1694	Osteogenesis Imperfecta Type II, 1720
Tumor-Related Hypophosphatemic Rickets, 1695	Osteogenesis Imperfecta Type III, 1721
Renal Osteodystrophy, 1696	Osteogenesis Imperfecta Type IV, 1721
Pathology, 1696	Incidence, 1722
Laboratory Findings, 1696	Pathology, 1722
Clinical Features, 1697	Clinical Picture, 1723
Radiographic Findings, 1697	Radiographic Findings, 1725
Medical Treatment, 1698	Severe Form, 1725
Orthopaedic Management, 1699	Milder Forms, 1726
Primary Hyperparathyroidism, 1701	Hyperplastic Callus and Tumors in Osteogenesis
Idiopathic Hypoparathyroidism, 1702	Imperfecta, 1726
Pseudohypoparathyroidism, 1703	Laboratory Findings, 1727
Hypervitaminosis D, 1704	Differential Diagnosis, 1727
Pathology, 1704	Treatment, 1729
Laboratory Findings, 1704	Medical Treatment, 1729
Clinical Features, 1704	Orthopaedic Treatment, 1729
Radiographic Findings, 1704	Prognostication and Parental Counseling, 1729
Treatment, 1705	Survival, 1729
Scurvy, 1705	Ambulation, 1730
Pathology, 1705	Antenatal Diagnosis, 1730
Clinical Features, 1706	Rehabilitation, 1730
Radiographic Findings, 1706	Management of Long Bone Fractures, 1730
Differential Diagnosis, 1707	Management of Long Bone Deformity, 1731
Treatment, 1707	Closed Osteoclasis Without Internal Fixation, 1731
Hypervitaminosis A, 1707	Closed Osteoclasis with Percutaneous Intramedullary
Clinical Features, 1707	Fixation, 1732
Radiographic Findings, 1707	Open Osteotomy with Intramedullary Fixation (Sofield
Diagnosis, 1707	Procedure), 1732
Treatment, 1707	Use of the Extensible Intramedullary (Bailey-Dubow)
Hypophosphatasia, 1708	Rod, 1733
Inheritance, 1708	Spinal Deformity and Its Management, 1738
