# Contents

In memory of Sir John Charnley, 1

Nas S. Eftekhari

## Section one **Displaced fractures of the femoral neck**

- 1 Classification of femoral neck fractures in the elderly as pathologic fractures, 9  
Rocco A. Calandruccio
- 2 The rationale for internal fixation and against hemiarthroplasty, 34  
Gordon A. Hunter
- 3 The rationale for primary hemiarthroplasty in the treatment of fractures of the femoral neck in elderly patients, 42  
Richard B. Welch
- 4 Displaced femoral neck fractures: the rationale for primary total hip replacement, 51  
Franklin H. Sim
- 5 Special problems of femoral neck fractures in adolescents and young adults, 62  
Richard E. King

## Section two **The Hip Society Award Papers**

- 6 The Frank Stinchfield Award Paper: Greater trochanteric advancement of the proximal femur: a clinical and biomechanical study, 77  
Armen S. Kelikian, Mihran O. Tachdjian, Michael J. Askew, and Murali Jasty

- 7 The Otto E. Aufranc Award Paper: Long-term follow-up of the Bombelli experience with osteotomy for osteoarthritis: results at 11 years, 106  
Richard F. Santore and Renato Bombelli

- 8 The John Charnley Award Paper: A comprehensive analysis of the factors affecting acetabular cup fixation and design in total hip replacement arthroplasty: a series of experimental and clinical studies, 129  
Indong Oh

### Section three **New developments in hip arthroplasty**

- 9 Overview of current attempts to eliminate methylmethacrylate, 181  
Jorge O. Galante
- 10 European experience with cementless total hip replacements, 190  
Erwin W. Morscher

### Section four **Metal backing of the acetabulum**

- 11 Analytical support for acetabular component metal backing, 207  
Roy D. Crowninshield, Douglas R. Pedersen, Richard A. Brand, and Richard C. Johnston
- 12 Finite-element analysis of a metal-backed acetabular component, 216  
Dennis R. Carter
- 13 The effect of metal backing on stresses in polyethylene acetabular components, 229  
Donald L. Bartel, Timothy M. Wright, and David Edwards
- 14 Advantages of metal-backed acetabular components for a total hip replacement: a clinical assessment with a minimum 5-year follow-up, 240  
William H. Harris and Richard E. White, Jr.

### Section five **Avascular necrosis of the femoral head**

- 15 Pathogenesis of ischemic necrosis of the femoral head, 249  
David S. Hungerford and Thomas M. Zizic
- 16 Avascular necrosis of the femoral head—diagnostic techniques, reliability and relevance, 263  
Marvin H. Meyers
- 17 Treatment of avascular necrosis of the femoral head, 279  
Raymond P. Ficat

- 18 Overview of attempts to revitalize the dead head in aseptic necrosis of the femoral head—osteotomy and revascularization, 296

Reinhold Ganz and Ueli Buehler

- 19 Osteonecrosis of the femoral head treated by pulsed electromagnetic fields (PEMFs): a preliminary report, 306

Nas S. Eftekhar, Mary M. Schink-Ascani, Sharon N. Mitchell, and C. Andrew L. Bassett
