Preface

This book is the result of an international symposium on bone transplantation, the first of its kind, held in Berne, Switzerland, on May 14–16, 1987. This symposium brought together some of the most outstanding experts – from all over the world, principally from North America and Europe – in the clinical bone transplantation and in basic research. It was an unique opportunity to summarize in a few days the state of the art in this field and to bring clinicians who carry out some research related to their work together with basic scientists. The clinician can on the one hand profit from the basis researcher's knowledge and on the other stimulate the researcher to share the orthopedic surgeon's interest in osteoarticular allografts. The book, like the symposium, contains two types of contributions:

1. Papers from invited experts who have often dedicated a significant part of their professional life to the subject of bone transplantation. Knowledge which would otherwise be scattered among original papers from many different sources, some of it less firmly established and therefore less well known, is thus collected together in one volume, so that the reader does not have to weed out a mass of less important material. These chapters may for a certain time act as a textbook on bone transplantation, but inevitably will eventually be superseded by new findings.
2. Descriptions of current research in all the main subjects covered in the state-of-the-art papers. To give all the contributors the opportunity to have their work published, this part takes the form of short communications, giving the reader an overview of current activity in bone transplantation research. It may be that some important topics are “underweighted” here; if this should be the case, however, the reader who needs more detailed information will be well served by the extensive bibliographies.

It was never our intention with this volume to present only one consistent approach to osteoarticular transplantation; rather the views reproduced accurately reflect the diversity of thinking and of research directions in this important area of orthopedic surgery and in related disciplines.

If the book stimulates more scientists to embark upon research into osteoarticular transplantation and arouses the interest of biologists, immunologists, and bone physiologists, an important goal has been reached.

The editors are indebted to all those who supported the symposium and the book, especially the Maurice E. Müller Foundation, Switzerland, and the Research Department of Sandoz Switzerland Ltd. We are particulary grateful to

the staff of Springer-Verlag for their tireless cooperation and in editing and formatting the many contributions. We also wish to thank all the authors who dedicated so much time and energy to providing the manuscripts for the symposium and for this book.

Table of Contents

Introduction to Update on Osteochondral Allograft Surgery <i>M. R. Urist</i>	1
Early Research on Bone Transplantation <i>H. de Boer</i>	7
Biology of Bone Auto- and Allografts	
Biology of Cortical Bone Graft Incorporation <i>H. Burchardt</i>	23
Fate of Vascularized Bone Grafts <i>A. J. Weiland</i>	29
Biology of Osteoarticular Allografts <i>V. M. Goldberg, C. H. Herndon and E. Lance</i>	51
Experimental Models for Bone Allografting <i>Y. Gotfried, T. Blum-Hareveni and D. G. Mendes</i>	59
Experimental Models for Joint Allografting <i>V. M. Goldberg</i>	68
The Incorporation and Function of DLA-Matched and -Mismatched, Fresh and Cryopreserved Massive Allografts in Dogs <i>S. Stevenson, N. Sharkey, G. Dannucci and R. Martin</i>	76
Segmental Vascularized and Non-vascularized Bone Allografts <i>O. Schwarzenbach, P. Regazzoni and M. Aebi</i>	78
Research on the Biology of Microvascular Bone Grafts <i>G. Stefani, P. Guizzi, B. Battiston and G. Brunelli</i>	82
A Comparison of Vascularized and Conventional Bone Grafts for Large Defects in Weight-Bearing Bones <i>J. F. Welter and K. L. B. Brown</i>	86

- Experimental Vascularized Bone Allograft Transplantation
*M. J. Yaremchuk, A. J. Weiland, M. A. Randolph, H. Nettelblad, Y. Gotfried,
 S. Kesmarky, P. C. Innis, J. P. Paskert, L. W. Clow, J. F. Burdick,
 W. P. A. Lee and Y. C. Pan* 88

- Implants of Frozen and Decalcified Allogeneic Bone in Rats
*P. Yde, G. S. E. Dowd, G. Bentley, F. Handelberg, P. P. Casteleyn,
 and P. Opdecam* 90

Immunology

- Introduction to Transplantation Immunology
P. C. Hiestand 93

- General Aspects of Organ Transplantation Surgery
F. Harder and J. Landmann 98

- Bone Transplantation, Passenger Cells and the Major Histocompatibility Complex
A. A. Czitrom 103

- The Target Cells in Vascularized Bone Allografts
Y. Gotfried, J. Yaremchuk, M. A. Randolph and A. J. Weiland 111

- The Role of Histocompatibility in Bone Allografting
*V. M. Goldberg, A. Powell, J. W. Shaffer, J. Zika, S. Stevenson, D. Davy
 and K. Heiple* 126

- Short-Term Immunosuppression and Dog Cortical Allografts
H. Burchardt 135

Bone Banking

- Organization, Legal Aspects and Problems of Bone Banking in a Large Orthopedic Center
W. W. Tomford, S. H. Doppelt and H. J. Mankin 145

- Bone Banking in Community Hospitals
A. A. Czitrom 151

- Bone Exposed to Heat
A. Kreicbergs and P. Köhler 155

- A Method for the Investigation of Bone Transplants, Ceramics, and Other Material in a Human Bony Layer
M. Roesgen 162

Perforated Demineralized Bone – A Highly Osteoinductive Allograft <i>E. Gendler</i>	165
Segmental Femoral Defect Model in the Rat <i>G. F. Muschler, J. M. Lane, J. Werntz, M. Gebhardt, H. Sandu, C. Piergentili, M. Nottebaert, C. Baker and A. Burstein</i>	167
Bone Banking – Experience with 1175 Donors <i>T. I. Malinin, M. D. Brown, W. Mnaymneh, O. Martinez, R. E. Marx and S. N. Kline</i>	170
Organization of a Bone Bank: Experience over 16 Years <i>P. Kalbe, A. Illgner and W. Berner</i>	172
Control of Sterility in Bone Banking with Irradiation <i>P. Hernigou, G. Delepine and D. Goutallier</i>	174
Conservation of Bone Homografts in Cialit: 5 Years Clinical Experience <i>F. Ghisellini, G. Palamini and G. Brugo</i>	176
Procedures and Practices for Aseptic Processing of Sterile Bone for Banking <i>D. A. Present, D. W. Anderson, F. A. Glowczewskie and W. J. Vanjonack</i>	178
Bone and Soft Tissue Banking: The University of Florida Experience <i>C. Reinecke, F. Glowczewskie, Jr., and D. Springfield</i>	180
Organizational Aspects of a Hospital Bone Bank <i>C. Delloye and E. Munting</i>	181

Bone Alternatives

Bone Morphogenetic Protein Induced Bone Formation and the Bone-Bone Marrow Consortium <i>M. R. Urist</i>	185
Reconstruction of Large Diaphyseal Defects by Autoclaved Reimplanted Bone: An Experimental Study in the Rabbit <i>A. Kreicbergs and P. Köhler</i>	198
Histological Response to Natural Bone Mineral and Synthetic Hydroxyapatite <i>H. Bereiter, A. H. Huggler, K. Kita and M. Spector</i>	209
Bone Regeneration with Collagen-Apatite and Mineral Bone <i>B.-D. Katthagen and H. Mittelmeier</i>	211

Demineralized Bone Matrix Induced Protein Synthesis and Bone Formation in Canine Muscle <i>T. J. Albert, I. A. Guterman, C. L. Morton, J. Lank and R. E. McLaughlin</i>	213
Injectable Bone Graft in Rabbit Radius Defects: Influence of Demineralized Bone Matrix, Bone Marrow and Cancellous Bone <i>K. G. Thorngren, P. Aspenberg and J. Wittbjer</i>	214
The Role of Osteoclasts in Demineralized Bone Powder Implants During the Angiogenetic Phase of Ossicle Formation <i>M. Bettex-Galland and E. Burger</i>	216
Evaluation of Experimental Osteoinduction in Different Animal Models <i>F. W. Thielemann and C. Etter</i>	218
Osteoinductive Activities of Dissociative Bone Matrix Extracts <i>U. Holz, F. W. Thielemann, G. Herr and G. Pfleiderer</i>	220
Bone Gelatine Revisited <i>J. M. Rueger, R. Inglis and A. Pannike</i>	221
Critical Factors in Successful Bone Induction <i>E. Munting and C. Delloye</i>	223
Hydroxyapatite Ceramic in a Dynamic Animal Model: Observations with the Polarizing Microscope and Biomechanical Studies <i>N. M. Meenen, J. F. Osborn, K. H. Jungbluth and V. Wening</i>	225
Experimental Spinal Fusion Using Demineralized Bone Matrix, Bone Marrow and Hydroxyapatite <i>T. S. Lindholm and P. Ragni</i>	227
Bone Autografting and Allografting in Large Skeletal Resection due to Tumor Resection <i>R. Capanna, R. Biagini, P. Ruggieri, R. De Cristofaro, C. Martelli, A. Ferraro, P. Picci and M. Campanacci</i>	229
Clinical Aspects I: Vascularized and Non-Vascularized Autografts	
Free Vascularized Fibular Graft <i>J. Brennwald</i>	237
Pedicled Autograft and Osteotomy in Revascularization of the Femoral Head <i>R. Ganz</i>	241

Autologous Bone-Grafts: Problems at the Donor Site <i>D. Grob</i>	245
Technique for Harvesting Autogenic Bone Paste <i>W. Dick, P. Regazzoni and B. Gerber</i>	246
The Use of Autogenic Bone Paste in Anterior Interbody Spine Fusion <i>W. Dick and H. Bereiter</i>	248
Production of Autologised Cancellous Bone with the Use of Homologous Cancellous Bone <i>A. Sárváry and G. Berentey</i>	250
Skeletal Reconstruction by Vascularized Fibular Transfer: Indications and Results <i>H. H. de Boer and M. B. Wood</i>	253
Vascularized Pedicular Rib Grafts in Operative Treatment <i>Z. Milinkovich, B. Bojanich, B. Radojevich, M. Zlatich, C. Abaidoo, N. Stankovich and V. Brusich</i>	254
The Pedicle Bone Graft: An Indication for Superselective Angiography <i>V. Klingmüller and G. Schwetlick</i>	255
Treatment of Idiopathic Osteonecrosis of the Femoral Head by Free Vascularized Peroneal Graft <i>H. Judet, J. Judet and A. Gilbert</i>	258
Vascularized Periosteal Grafts <i>A. C. Masquelet, C. Romana and C. V. Penteado</i>	259
Clinical Aspects II: Bone Allografts and Alternatives	
Allograft Reconstruction in Revision Total Hip Surgery <i>R. D. Oakeshott, J. P. McAuley, A. E. Gross, D. A. F. Morgan, D. J. Zukor, J. F. Rudan and P. J. Brooks</i>	265
Long-Term Results of Osteoarticular Allografts in Weight-Bearing Joints <i>B. A. Waber, W. W. Tomford, H. J. Mankin and L. A. Butterfield</i>	275
The Combination of Bone and Bone Substitutes in Tumor Surgery of the Pelvis and Hip <i>W. Mutschler and C. Burri</i>	284

Reconstruction of Post-Traumatic Articular Surface Defects Using Fresh Small-Fragment Osteochondral Allografts <i>D. J. Zukor, B. Paitich, R. D. Oakeshott, P. J. Brooks, J. P. McAuley J. F. Rudan, F. Langer and A. E. Gross</i>	293
Replacement of the Deficient Acetabulum by Bone Transplants in Total Hip Replacement <i>B. Radojevich, M. Zlatich, Z. Milinkovich, C. Lazovich, J. Nedeljkovich, N. Stankovich and C. Abaidoo</i>	306
Fresh Bone Allograft in THR Revision Surgery <i>R. G. Ceroni, A. Pace and M. Nicolosi</i>	309
Use of Homologue Bone Graft Sterilized in Autoclave for Reconstruction in Loosening of Total Hip Prosthesis: A Series of 90 Reconstructions with Bone Graft and Cementless Hip Replacement CLW <i>D. Weill, M. Schroeder and P. Fiore</i>	311
Human Bone Morphogenetic Protein Augmentation Grafting of Segmental Defects of the Lower Extremity <i>E. E. Johnson and M. R. Urist</i>	314
Sintered Bone: A New Type of Bone Graft <i>Yu Ueno</i>	316
Massive Allografts in Non-Tumorous Orthopaedic Conditions <i>W. Mnaymneh., T. Malinin and W. Head</i>	318
Our Experience with Frozen Allografts: First Short-Term Results <i>F. Handelberg, P. Yde, H. de Boeck, P. P. Casteleyn and P. Opdecam</i>	321
Our Experience with Massive Deep-Frozen Allografts in Limb Salvage Surgery and with Cryopreserved Osteoarticular Allografts in Joint Lesions <i>C. Delloye, P. de Nayer, L. Coutelier and A. Vincent</i>	323
Three-Years' Experience with Small Freeze-Dried Bone Implants Used in Various Conditions <i>C. Delloye, N. Allington, E. Munting, B. Geulette and A. Vincent</i>	325
Allogeneic Osteoarticular Grafts About the Knee <i>A. Alho, E. O. Karaharju, O. Korkala, E. Laasonen, T. Holmström and G. P. Andersen</i>	327
Frozen Homologous Trabecular Bone Allografts: 12-Years' Experience with Banking and Clinical Use <i>G. U. Exner, A. R. Goldmann, M. Nottebaert and A. Schreiber</i>	329

Orthopedic Results of 87 Massive Allografts in Reconstructive Surgery for Bone Cancers <i>G. Delepine, P. Hernigou, D. Goutallier and N. Delepine</i>	331
Bone Union of Allografts and Chemotherapy Considerations About 55 Consecutive Cases <i>N. Delepine, G. Delepine, P. Hernigou, M. Hassan and J. C. Desbois</i>	333
The Influence of Pre- and Postoperative Polydrug Chemotherapy on Bone Healing in Tumor Surgery <i>W. Winkelmann and H. Jürgens</i>	335
Clinical, Metabolic and Structural Studies on Large Osteoarticular Allografts in Bone Tumor Surgery <i>A. J. Aho, T. Efkors, J. Eskola and P. Jussila</i>	339
A Massive Vascularized Allograft of Femoral Shaft <i>P. Chiron, J. A. Colombier, J. L. Tricoire, J. Puget, G. Utheza, Y. Glock and P. Puel</i>	342
Collagen and Bone Formation After Metaphyseal Osteotomy and Gradual Distraction <i>J. Peltonen, E. Karaharju, A. Aalto, M. Vauhkonen and I. Alitalo</i>	344
Bone Lengthening Methods in the Treatments of Large Segmental Bone Defects <i>J. de Pablos, J. Cañadell, G. D. MacEwen and J. R. Bowen</i>	346
