Note to Readers	xv
Introduction	1
How to Use this Book	1
1. The Body: The Basis for Dance.....	3
Everything Needs a Name – the Anatomical Nomenclature of Movement	3
The Neutral Stance – the Starting Position for Movement.....	3
Body Axes and Body Planes – the Geometry of the Human Body	4
The Nomenclature of Movement	5
The Organization of the Body	6
The Composition of Tissues.....	7
Composition – the Principle is Always the Same	7
The Different Types of Tissue – the Difference is in the Detail.....	7
Regeneration and Adaptation – Tissue is Constantly Changing.....	8
The Skeletal System: Bones, Cartilage and Joints.....	9
Bones	9
Cartilage	10
Joints	11
The Muscles – the Motor of Movement	13
Structure	14
Function	15
The Different Types of Muscle Fibre	18
The Nervous System – the Body’s Conductor.....	19
Structure	19
Function	21
2. The Spine: The Whole is More than the Sum of its Parts.....	25
3D Anatomy	25
Structure	25
The Spinal Regions and their Special Characteristics.....	28
3D Function	29
Movements of the Spine.....	30

Musculature	31
The Architecture of the Spine	34
Breathing	35
Dance in Focus: Load and Overload	36
Load	36
Overload.....	39
Pitfalls in Dance	42
Hyperlordosis – a Strain on the Back.....	42
The “Overly-straightened” Back.....	43
The “Relaxed” Posture	44
Scoliosis – Suitable for Dance?	45
A Closer look – Self-analysis.....	47
Form and Mobility	47
Function	48
Strength and Stability	49
Tips and Tricks for Prevention	50
In Everyday Life	50
Specific Exercises.....	50
In Training.....	55
3. The Pelvis as the Centre	57
3D Anatomy.....	57
Structure	57
3D Function	58
Movements of the Pelvis	59
Musculature	61
Dance in Focus: Load and Overload.....	62
Load	62
Overload.....	63
Pitfalls in Dance	64
Forced Turnout – the Effect on the Pelvis	64
Tuck Under of the Pelvis.....	65
One-sided Training – Increased Pelvic Torsion.....	66
A Closer Look – Self-analysis	66
Form and Mobility	66
Function and Stability	67

Tips and Tricks for Prevention	69
In Everyday Life	69
Specific Exercises	69
In Training	73
 4. The Hip: A Joint with Consequences	 75
3D Anatomy	75
Structure	75
3D Function	77
Hip Movements	78
Musculature	78
 Dance in Focus: Load and Overload	 83
Load	83
Overload	85
 Pitfalls in Dance	 87
Forced Turnout – the Effect on the Hip Joint	87
High Extension of the Legs – Pain in the Groin	88
Hypermobility in the Hip – Hip Dysplasia	89
 A Closer Look – Self-analysis	 91
Form and Flexibility	91
Function	92
 Tips and Tricks for Prevention	 94
In Everyday Life	94
Specific Exercises	94
In Training	98
 5. Standing Firm: The Knee as Coordination Unit	 101
3D Anatomy	101
Structure	101
3D Function	103
Movements in the Knee Joint	104
Musculature	104
Leg Shapes	107
 Dance in Focus: Load and Overload	 108
Load	108
Overload	109

Pitfalls in Dance	111
The Forced Turnout – the Effect on the Knee Joint.....	111
The Uncontrolled Plié	112
Hyperextended Knees	113
A Closer Look – Self-analysis	114
Form and Flexibility	114
Function and Strength.....	115
Tips and Tricks for Prevention	116
In Everyday Life	116
Specific Exercises.....	117
In Training.....	121
 6. The Foot as a Base.....	 123
3D Anatomy	123
Structure	123
3D Function	125
The Arches of the Foot.....	125
Terminology of Foot Movement.....	125
The Joints of the Foot.....	126
Musculature	128
Foot Shapes	130
 Dance in Focus: Load and Overload.....	 132
Load	132
Overload.....	134
 Pitfalls in Dance	 139
Rolling In – the Functional Hyperpronated Foot	139
Point and Relevé – the Great Range of Motion in the Foot.....	140
The Deep Plié – too much Tension is Harmful.....	141
Pes cavus – a High Arch with Problems	142
On Pointe, but When?.....	143
 A Closer Look – Self-analysis	 144
Form and Mobility	144
Function	145
Strength and Stability	145
 Tips and Tricks for Prevention	 147
In Everyday Life	147
Specific Exercises.....	147
The Timing for Pointing the Foot	151
In Training.....	152

7. Shoulders and Arms: Stability Despite Mobility	153
3D Anatomy	153
Structure	153
The Joints	155
3D Function	156
Movements of Shoulder and Arm	157
Musculature	158
Dance in Focus: Load and Overload	161
Load	161
Overload	162
Pitfalls in Dance	163
Raised Shoulders	163
Pulled Back Shoulder Blades	164
A Closer Look – Self-analysis	165
Form and Position	165
Function and Strength	165
Tips and Tricks for Prevention	167
In Everyday Life	167
Specific Exercises	167
In Training	171
8. Dancing with Heart and Soul	173
Demands on the Psyche	173
Impact of the Dance Class	173
Different Forms of Dance Correction	174
No Dance Studio without a Mirror?	174
Dancing as a Profession and as a Mission	175
Working Conditions in Dance Schools and Dance Companies	175
Maintaining a Healthy Balance	175
Life after Dance	177
9. Nutrition: An Important Aspect of Training	179
The Components of Nutrition	179
Carbohydrates – the Body’s Energy Supply	180
Fat – Unloved but Necessary	181

Protein – the Body’s Building Material	183
Vitamins, Minerals etc.	183
Drinking – the Body’s Source of Water	186
Dehydration is Unhealthy.....	187
What and When to Drink	187
Eating Disorders – it’s all about Weight.....	189
Supply and Demand – Energy Balance Determines Body Weight.....	189
Types of Eating Disorders.....	189
Physiological Consequences	190
10. Dance and Growth.....	191
The Basics of Growth	191
Growth Takes Place in the Bones	191
Growth Happens in Spurts	192
Every Age is Different	193
Specialities in Growth	195
All in Good Time – What Can be Trained, and When?	196
Flexibility.....	196
Coordination.....	196
Strength	197
Endurance	197
Advice on Training During Growth.....	198
Growth and Dance have an Impact on Each Other	198
Growth Can Help Young Dancers	198
Challenges for Young Dancers	199
11. Help and Self-help: Dealing with Injuries	201
Inflammation and Healing – The Natural Course of Injuries	201
Inflammation	201
The Healing Process.....	201
First aid in the Dance Studio	202
Muscle Injuries	204
Sore Muscles.....	204
Muscle Cramp.....	205
Muscle Spasm and Myogelosis	205
Pulled Muscles and Muscle Fibre Tears.....	206

Tendon Injuries	207
Tendon Insertion Problems	207
Tendinitis and Tenosynovitis	207
Bone Injuries	208
Periostitis	208
Bone Fractures	208
Osteoporosis – A Cause of Stress Fractures	209
Each Injury has Consequences	211
 12. Dancing the Smart Way: How to Plan Training	 213
Flexibility – Stretching is a Part of Dance	214
Stretching – the Many Methods	215
Timing is Important – When is Stretching Effective?	218
Endurance – the Basis for High Performance	219
Energy Production – it’s All about Oxygen	219
Stamina – the Basis for Healthy Dancing.....	222
Endurance through (Dance) Training	223
Warming Up and Cooling Down	225
Warming Up.....	225
Cooling Down	227
Training –Timing Matters	228
Training Boosts the Body	228
Training at the Right Time	228
Overtraining is not Uncommon.....	230
Training and Rehearsal Planning – Tuning in Professional Dance Schools and Companies.....	232
Recovery – After Dancing is Before Dancing	234
One Thing at a Time – Regeneration Takes Place in Stages	235
Sensible Regeneration Improves Fitness	235
Building Up and Easing Down	237
Building Up – the Art of Gradual Increase	237
Easing Down – Step-By-Step Reduction	237
 Further Reading.....	 239
 Index	 241
