Videos	xi
Foreword	xii
Preface	xiii
Contributors	xiv
1. Detection of Microbes in Orthopaedic Infections	1
<i>Michael Henry, Andy O. Miller, and Barry D. Brause</i>	
1.1 Introduction	1
1.2 Culture-Based Microbiology	2
1.2.1 Limitations of Culture-Based Microbiology	3
1.2.2 Detection of Microbes in Biofilm	4
1.2.3 Infections with Atypical Organisms ..	4
1.2.4 Orthopaedic Hardware Infections	5
1.2.5 Native Bone and Joint Infections	8
1.3 Molecular Techniques	10
1.3.1 Polymerase Chain Reaction (PCR) ...	10
1.3.2 Next-Generation Sequencing (NGS)	12
1.4 Conclusions	13
2. Antibiotics for Orthopaedic Infections	18
<i>Alaina S. Ritter and Sandra B. Nelson</i>	
2.1 Systemic Antibiotics	18
2.1.1 Definitions	18
2.1.2 Antibiotic Selection and Administration	19
2.1.3 Intravenous versus Oral Antibiotics .	21
2.2 Antiseptics	25
2.2.1 Povidone-Iodine	25
2.2.2 Chlorhexidine (Gluconate/Digluconate)	26
2.3 Carriers that may be Associated with Antibiotics	26
2.3.1 Nondegradable	26
2.3.2 Biodegradable	27
2.4 Antibiotics for Use in Carriers ...	28
2.4.1 Gentamicin/Tobramycin	30
2.4.2 Vancomycin	30
2.5 Topical Antibiotics	30
2.6 Treatment Failure	30
2.7 Collaboration between Orthopaedic Surgeons and Infectious Disease Specialists ...	31
2.8 Conclusion	31
3. Irrigation Solutions for Orthopaedic Infections	34
<i>Michael Yayac, Samuel J. Clarkson, Craig Della Valle, and Javad Parvizi</i>	
3.1 Acetic Acid	34
3.1.1 Overview of Antiseptic Agents	34
3.1.2 Efficacy as Surgical Wound Irrigant ..	35
3.2 Bacitracin and Polymyxin	36
3.2.1 Overview of Antiseptic Agent	36
3.2.2 Efficacy as a Surgical Wound Irrigant	36
3.3 Dilute Povidone-Iodine (PI)	37
3.3.1 Overview of Antiseptic Agent	37
3.3.2 Efficacy as a Surgical Wound Irrigant	38
3.4 Chlorhexidine	39
3.4.1 Overview of Antiseptic Agent	39
3.4.2 Efficacy as a Surgical Wound Irrigant	40
3.5 Sodium Hypochlorite (NaOCl) ...	40
3.5.1 Overview of Antiseptic Agent	40

Contents

3.5.2	Efficacy as a Surgical Wound Irrigant	41	3.6.2	Efficacy as a Surgical Wound Irrigant	42
3.6	Hydrogen Peroxide	41	3.7	Conclusion	42
3.6.1	Overview of Antiseptic Agent	41			
4.	Surgical Wound Dressings after Treating Orthopaedic Infections	46			
	<i>Patrick Moody and Bryan Springer</i>				
4.1	Introduction	46	4.3.2	Dressing Application Tips and Tricks	52
4.2	Characteristics of Optimal Surgical Dressings	47	4.3.3	Wound Vacuum Systems	53
4.3	Dressing Types	48	4.4	Algorithm for Surgical Dressing Selection	57
4.3.1	Nonocclusive and Occlusive Dressings	48	4.5	Conclusion	58
5.	Osteomyelitis	61			
	<i>Martin McNally</i>				
5.1	Introduction	61	5.6	Microbiology	73
5.2	Terminology	62	5.7	Treatment of Osteomyelitis	75
5.3	Classification	64	5.7.1	General Considerations	75
5.3.1	Type 1 (Medullary)	64	5.7.2	Acute Osteomyelitis	77
5.3.2	Type 2 (Superficial)	66	5.7.3	Chronic Osteomyelitis	77
5.3.3	Type 3 (Localized)	68	5.7.4	Operative Treatment	78
5.3.4	Type 4 (Diffuse)	68	5.7.5	Tissue Sampling	79
5.4	Diagnosis	69	5.7.6	Tissue Excision	79
5.4.1	Clinical Features	69	5.7.7	Antimicrobial Therapy	81
5.4.2	Laboratory Tests	69	5.7.8	Dead Space Management	82
5.4.3	Imaging	69	5.7.9	Bone Stabilization	82
5.4.4	Microbiological Diagnosis	72	5.7.10	Soft-Tissue Coverage	85
5.4.5	Histological Diagnosis	72	5.7.11	Staging of Surgery	85
5.5	Diagnostic Criteria	73	5.8	Conclusion	85
6.	Treatment of the Septic Native Joint	88			
	<i>Timothy L. Tan and Sommer Hammoud</i>				
6.1	Introduction	88	6.3.1	Common Organisms	93
6.2	Diagnosis	89	6.3.2	Gonococcal Arthritis	94
6.2.1	Risk Factors	89	6.3.3	Other Pathogens	94
6.2.2	Joint Involvement	90	6.3.4	Antimicrobial Therapy	94
6.2.3	Clinical Manifestations	90	6.3.5	Surgical Treatment	95
6.2.4	Serum Evaluation	91	6.3.6	Needle Aspiration	95
6.2.5	Synovial Analysis	91	6.3.7	Arthroscopic Treatment	95
6.2.6	Imaging	93	6.3.8	Open Treatment	96
6.3	Treatment	93	6.4	Conclusion	98

7. Management of Periprosthetic Joint Infection	101
<i>Malcolm E. Dombrowski and Brian A. Klatt</i>	
7.1 Introduction	101
7.2 Chronicity of Infection	103
7.3 Antibiotic Management Alone	104
7.4 Irrigation and Debridement ...	104
7.4.1 Irrigation and Debridement without Polyethylene Exchange	104
7.5 DAIR	105
7.6 One-Stage Exchange Arthroplasty	107
7.6.1 Preparation	108
7.6.2 Debridement	108
7.6.3 Temporary Closure	109
7.6.4 New Prosthesis Implantation	109
7.6.5 Outcomes of One-Stage Exchange Arthroplasty	110
7.7 Two-Stage Exchange Arthroplasty	111
7.7.1 First Stage: Debridement and Antibiotic Spacer Implantation ...	111
7.7.2 Second Stage: Reimplantation	113
7.7.3 Outcomes of Two-Stage Exchange Arthroplasty	114
7.8 Salvage Procedures for PJI	114
7.9 Conclusion	115
8. Infection after Fracture Fixation and Infected Nonunions	122
<i>Arvind von Keudell and Michael J. Weaver</i>	
8.1 Antibiotic Prophylaxis for Open Fractures	122
8.2 Diagnosis	124
8.2.1 Clinical Diagnosis	124
8.2.2 Laboratory Tests	124
8.3 Imaging	124
8.3.1 Radiography	124
8.3.2 Computed Tomography	127
8.3.3 Magnetic Resonance Imaging	127
8.3.4 Nuclear Medicine Studies	128
8.4 Microbiology	128
8.4.1 Cultures	128
8.4.2 Common Organisms	129
8.5 Surgical Treatment	129
8.5.1 Irrigation Solutions	129
8.5.2 Pin Tract Infections	130
8.5.3 Irrigation and Debridement with Hardware Retention	130
8.5.4 Irrigation and Debridement with Hardware Removal	131
8.5.5 Irrigation and Debridement and Revision Fracture Surgery—One-Stage	131
8.5.6 Irrigation and Debridement with Hardware Removal and Antibiotic Spacer Placement—Two-Stage	131
8.6 Soft-Tissue Coverage	132
8.7 Antibiotics	132
8.8 Conclusion	132
9. Spine Infections	135
<i>Caleb M. Yeung and Melvin C. Makhni</i>	
9.1 Spinal Epidural Abscesses	135
9.1.1 Introduction and Epidemiology ...	135
9.1.2 Anatomy and Pathogenesis	136
9.1.3 Presentation and Diagnosis	136
9.1.4 Management and Surgical Decision-Making	138
9.1.5 Prognosis	140
9.2 Vertebral Osteomyelitis and Diskitis	140
9.2.1 Introduction and Epidemiology ...	140
9.2.2 Anatomy and Pathogenesis	141
9.2.3 Presentation and Diagnosis	142
9.2.4 Management and Surgical Decision-Making	143
9.2.5 Prognosis	145
9.3 Conclusion	146

10. Graft Infections	151
<i>Robert Tisherman, Itamar Neto, Orr Limpisvasti, and Carola F. van Eck</i>	
10.1 Introduction	151
10.2 Risk Factors for Graft Infection	152
10.2.1 The Effect of Graft Type on Rates of Postoperative Infection.....	152
10.3 Clinical Presentation and Management	155
10.3.1 Clinical Presentation.....	155
10.3.2 Laboratory Evaluation.....	156
10.3.3 Surgical Site Infection versus Intra-articular Graft Infection.....	157
10.3.4 Organisms Responsible for Graft Infection.....	157
10.4 Management of Graft Infection	157
10.4.1 Nonsurgical Management.....	157
10.4.2 Surgical Management of Graft Infection.....	158
10.4.3 Graft Retention.....	162
10.4.4 Hardware Retention.....	163
10.4.5 Graft Replantation.....	163
10.4.6 Antibiotic Management.....	164
10.5 Outcomes and Complications ..	165
10.5.1 Recurrent Instability and Reoperation.....	165
10.5.2 Patient Reported Outcomes Following Graft Infection.....	165
10.5.3 Graft Infection Cost.....	165
10.6 Graft Infection Prevention	166
10.6.1 Intraoperative Graft Antibiotics....	166
10.7 Intraoperative Autograft Contamination	166
10.8 Conclusion	167
Index	171
