Regional Nerve Blocks in Anesthesia and Pain Therapy

Imaging-guided and Traditional Techniques
Fifth Edition

Contents

Part I General Consideration

1 Regional Nerve Block in Anesthesia and Pain Therapy: General Consideration	3
Danilo Jankovic	
Regional Nerve Blocks and Infiltration Therapy in Clinical Practice.	4
General Consideration	4
Nerve Blocks in Surgery and Pain Therapy	5
Nerve Blocks and Chronic Pain	5
Examination and Patient Preparation	6
Technical Requirements	6
Accessories for Primary Care	10
Anesthetic Machine	10
Peripheral Nerve Stimulator	11
Ultrasound.	11
Use of Local Anesthetic in Regional Anesthesia and Pain Therapy	12
General Consideration	12
Chemical Structure and Physicochemical Properties	13
Clinical Significance of the Physicochemical Properties	13
Local Anesthetic Potency	13
Equipotent Concentrations	15
Block Profile	15
Incompatibility	15
Side Effects and Systemic Effects.	15
Systemic Effects	15
Substance-Specific Side Effects	16
Allergenic Potential.	16
Selection of Suitable Substances for Regional Block.	17
Regional Anesthesia in the Patient Receiving Antithrombotic or Thrombolytic Therapy	21
General Consideration	21
Anatomical Considerations for Hematoma Development in Spinal and Non-spinal Areas	22
Plexus and Peripheral Blockade in the Anticoagulant Patient	22
Chronic Pain and Stress as a Hypercoagulable State	22
Specific Recommendations for Pain Management and Regional Anesthesia in Patients Utilizing Anticoagulants or Antiplatelet Agents	22
Conclusion	28
Suggested Reading	28
2 Basics of Ultrasound Imaging	33
Herman Sehmbi and Anahi Perlas	
Basics of Ultrasound Physics	33

Introduction	33
Characteristics of an Ultrasound Wave	34
Generation of Ultrasound Waves	34
Structure of an Ultrasound Transducer	34
Interaction of Ultrasound with Tissues	35
Absorption	35
Reflection	35
Refraction	36
Attenuation	36
Acoustic Impedance	36
Image Acquisition and Processing	38
Ultrasound Transducer Characteristics	38
Linear Array Transducer	38
Curved Array Transducers	38
Resolution	38
Image Optimization	40
Artifacts	44
Practical Approach to Scanning	46
Procedural Ergonomics	46
Positioning and Care of the Patient	46
Positioning of the Physician	46
Positioning the Equipment	46
Position of the Assistant	47
Scanning Methodology	47
Needling Techniques	50
Needle Insertion Technique	50
Suggested Reading	52
3 Nerve Stimulation and Stimulating Catheter	53
Vivian H. Y. Ip, Rakesh V. Sondekoppam, and Ban C. H. Tsui	
Introduction	53
Background and Basic Principles of Nerve Stimulation	54
Electrical Principle	54
The Use of Nerve Stimulation in Nerve Localization	54
Limitations of Nerve Stimulation in Practice	55
Stimulating Environmental Factor	55
Peripheral Nerve Stimulation in Ultrasound Era	56
Multimodal Monitoring Technique	56
Stimulating Nerve Block Catheters	58
Epidural Stimulation Test	58
Tool for Teaching	59
Future Directions	59
Challenges of Neuromodulation in Acute Pain Management	59
A Birth of New “Hybrid Regional Technique”	60
Conclusion	60
Suggested Reading	60
4 Serious Complications of Regional Anaesthesia	63
M. Kerr, R. Brull, and A. Macfarlane	
Central Neuraxial Blockade	64
Neurological Complications	64
Trauma	64
Epidural (or Subdural) Haematoma	65
Hypoperfusion Ischaemic Cord Injury	65

Cauda Equina Syndrome	65
Arachnoiditis	66
Transient Neurological Symptoms	66
Post-dural Puncture Headache	66
Infectious Complications	67
Reducing Risk	67
Cardiovascular Complications	67
Reducing Risk	67
Respiratory Complications	68
Reducing Risk	68
Wrong Route of Injection	68
Peripheral Neuraxial Blockade	68
Generic Complications	68
Neurological	68
Mechanical Trauma	69
Toxicity	69
Ischaemic	69
Inflammatory	69
Infectious	70
Local Anaesthetic Systemic Toxicity	71
Anaphylaxis	71
Wrong Site Block	71
Block-Specific Complications	72
Pneumothorax	72
Phrenic Nerve Blockade	72
Inadvertent Neuraxial Blockade or Spinal Cord Injury	72
Inadvertent Organ Damage	72
Suggested Reading	73
5 Local Anesthetic Systemic Toxicity	77
Marina Gitman, Kasha Bornstein, Alessandra Della Porta, Ayden Zarkhah, and Guy Weinberg	
Introduction	77
Mechanisms	78
Incidence	78
Clinical Context	79
Clinical Presentation	79
Prevention	79
Treatment	80
Airway Management	81
Neurologic Support	81
Cardiovascular Toxicity Management	82
Lipid Emulsion	82
Mechanism of ILE	82
Conclusion	82
Suggested Reading	83
Part II Nerve Block for Regional Anesthesia and Pain Therapy in Head and Neck Region	
6 Regional Anesthesia in Ophthalmology	87
André van Zundert, Chandra Kumar, and Danilo Jankovic	
General Consideration	87

Indications and Contraindications.	88
Functional Orbital Anatomy	88
Functional Orbital Physiology	91
Assessment and Preparation of Patients	91
Preparation Before Ophthalmic Blocks	91
Sedation and Analgesia During Ophthalmic Blocks.	92
Technique	92
Anticoagulation and Eye Block	99
Local Anesthetic Agents for Ophthalmic Blocks	99
Role of Vasoconstrictor.	99
Role of Hyaluronidase	99
Intraocular Pressure and Ophthalmic Blocks	99
Retained Visual Sensations During Ophthalmic Blocks.	99
Intraoperative Care	100
Advantages and Disadvantages of Different Techniques	100
Choosing a Technique.	100
Conclusion	100
Akinesia of the Orbicularis Oculi Muscle: Facial Nerve Block	100
General Consideration	100
Indications.	100
Functional Anatomy	101
Block Techniques	101
Complications	103
Suggested Reading	103
7 Airway	105
Michael Seltz Kristensen, Wendy H. Teoh, and Danilo Jankovic	
Anesthesia of the Airways	105
General Considerations.	105
Anatomy	105
Anesthesia of the Larynx and Trachea for AWAKE Intubation	107
Flexible Bronchoscope-Guided Intubation.	107
Techniques for Blocking Individual Nerves of the Airway	108
Vagus Nerve, Superior Laryngeal Nerve, and Recurrent Laryngeal Nerve	108
Superior Laryngeal Nerve Block	110
Materials	110
Ultrasound-Guided Superior Laryngeal Nerve Block	111
Recurrent Laryngeal Nerve Block by Trans-Cricothyroid-Membrane	
Injection. Palpation Method	113
Recurrent Laryngeal Nerve Block (Transtracheal/Trans-Cricothyroid-Membrane	
Injection) - Ultrasound Guided.	114
Glossopharyngeal Nerve Block	117
Anatomy	117
Indications.	117
Contraindications	118
Procedure	118
Injection Technique.	118
Glossopharyngeal Nerve Block, Ultrasonographic Approach	119
Potential Problems	119
Suggested Reading	120
8 Trigeminal Nerve Anatomy and Peripheral Branches Block	121
Danilo Jankovic and Ban Tsui	
General Consideration	121
Functional Anatomy	121

Ophthalmic Nerve	124
Maxillary Nerve & Pterygopalatine Fossa (PPF) & Pterygopalatine Ganglion (PPG)	124
Anatomy of the Pterygopalatine Fossa (PPF)	125
Contents	125
Innervation	125
Gateways	126
Boundaries	126
Pterygopalatine Ganglion (PPG)	126
Mandibular Nerve and Otic Ganglion	126
Mandibular Nerve	126
Otic Ganglion	127
Trigeminal Nerve: Peripheral Branches Block	127
General Consideration	127
Block of the Ophthalmic Nerve Branches	127
Block of the Maxillary Nerve Branches	129
Block of the Mandibular Nerve Branches	130
Ultrasound Imaging for Peripheral Branches of Trigeminal Nerve	132
Scanning Technique	132
Suggested Reading	133
9 Trigeminal Nerve: Deep Block	135
Antoun Nader, Louise Hillen, and Danilo Jankovic	
Ultrasound-Guided Blockade of the Trigeminal Nerve Divisions Through the Pterygopalatine Fossa	135
General Considerations	135
Indication (Patient Selection)	136
Contraindications	136
Functional Anatomy	136
Technique	136
Complications	138
Practical Tips (How to Improve Success and Avoid Complications)	139
Literature Review	139
Conclusion	140
Traditional Techniques	140
Block of the Main Trunk of Maxillary Nerve and Pterygopalatine Ganglion in the Pterygopalatine Fossa (PPF)	140
Block of the Mandibular Nerve and Otic Ganglion in the Infratemporal Fossa	144
Gasserian Ganglion Block (Fluoroscopic or CT-Guided)	146
Suggested Reading	150
10 Trigeminal and Sphenopalatine Procedures	153
Andre Marques Mansano and Agnes R. Stogicza	
Trigeminal Procedures	153
General Considerations	153
Indication for Trigeminal Nerve Intervention	153
Functional Anatomy	153
Technique: Radiofrequency Trigeminal Ablation	154
Technique: Percutaneous Trigeminal Balloon Compression	155
Complications of Thermal Radiofrequency and Balloon Compression Techniques	156
Practical Tips	156
Literature Review	157
Sphenopalatine Procedures	158
General Considerations	158

Indication	158
Functional Anatomy	158
Technique	158
Literature.	165
Suggested Reading	165
11 Occipital Nerve Block	167
Vitaliano Di Grazia and Philip Peng	
General Consideration	167
Indication/Patient Selection	167
Anatomy	168
Technique for Greater Occipital Nerve.	168
Distal Approach at the Nuchal Line	168
Proximal Approach at C2	170
Technique for Lesser Occipital Nerve	171
Complication.	171
Practical Tips.	171
Literature Review	172
Suggested Reading	172
12 Cervical Sympathetic Chain and Superior Cervical Ganglion Block	175
Paul Tumber and Danilo Jankovic	
General Considerations: Stellate Ganglion Block	176
Indications.	176
Contraindications	176
Functional Anatomy	177
Effects of the Block: Characteristic Unilateral Symptoms	179
Procedure for Ultrasound-Guided Stellate Ganglion Block	180
Preparation and Patient Positioning	180
Scanning Technique and Sonoanatomy	180
Technique	180
Dosage.	181
Block Series	181
Side Effects	182
Complications	182
Intravascular Injection.	182
Epidural or Subarachnoid Injection	182
Pneumothorax	182
Practical Tips.	182
Literature Review	183
Traditional Approach for SGB (Paratracheal Anterior Technique).	183
Practical Tips.	183
Disadvantages and Limitations of Non-ultrasound-Guided Approaches	184
Conclusion	184
General Considerations: Superior Cervical Ganglion Block	184
Indications.	185
Contraindications	185
Functional Anatomy	185
Procedure for Ultrasound-Guided Superior Cervical Ganglion Block.	186
Patient Positioning	186
Scanning Technique and Sonoanatomy	186
Injection Technique.	186
Effects of the Block.	187
